

## The Lone Worker App...

ASB Operations are proud to present the new Lone Worker App, which allows your staff to stay safe whenever they are working alone, out in the field. Downloading the App onto your mobile device transforms your phone into fully functional personal safety device.

## Simple download...

With just a few clicks, each lone worker can simply download the Lone Worker App onto their mobile phone

- ☒ Windows
- ☒ Android
- ☒ Apple

## GPRS Tracking...

Once using the The Lone Worker App, the lone worker will be tracked using GPRS technology. The Lone Workers ID and location will transmit to our Alarm Centre, where our team will be able to assist with any alarms that are raised.

## Meeting set up...

Lone Workers can simply set appointments they have upcoming, so as to ensure they are always protected, as well as being able to raise the roaming alarm, wherever they are in the field.

## Raising the Alarm...

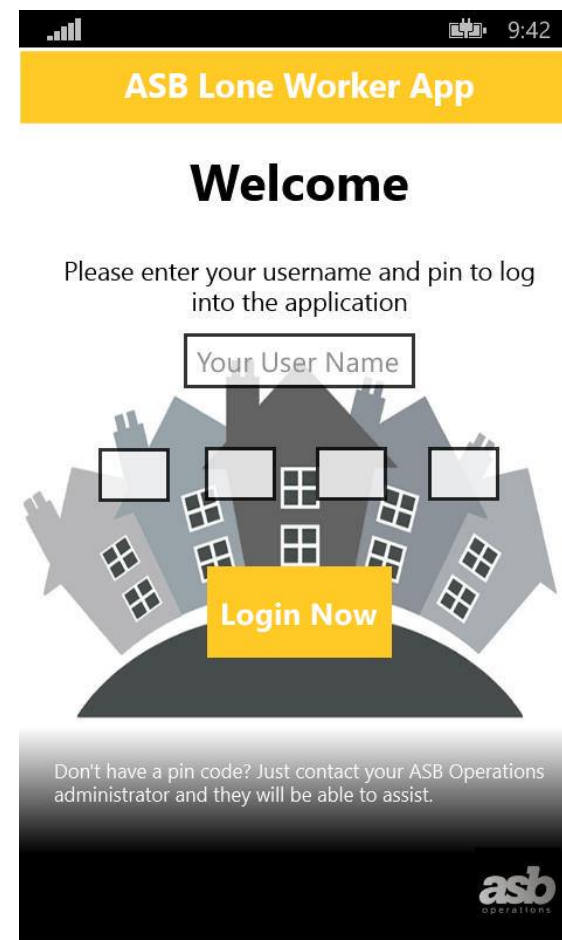

In the unlikely event that the lone worker needs to raise an alarm, they will be able to do so using the App at the press of a button. This will immediately raise an alarm in our Alarm Centre, who will be able to make contact with the lone worker immediately.

## Follow up Alarm process...

At ASB Operations we pride ourselves on being able to work the way our clients want us to. So, if you have any specific requirements for us when it comes to dealing with your alarms, we will change the way we work to meet your requirements.

## 24 hour call centre...

ASB Operations operate a 24 hour call centre, which houses wider reaching services like the Respect Line and our 24/7 maintenance call handling service. We are therefore available for your Lone Workers round the clock, 24/7, wherever or whenever they may be working - at the click of a button, we are on hand to assist.

If you would like to trial our service for FREE for a 30 day period, we're just a call away!....

Before we do anything...

We will be happy to walk you through The Lone Worker App in one of our on-line video conferences, so you can see the App working live.

Meeting in person...

Then we can meet in person to discuss any specific requirements you may have as well as agreeing how you would like for your alarms to be managed by our team.

Costs...

As is the case with all of our services, at ASB Operations we always try and keep our costs as low as possible for our clients.

If you decide to come on board with us and use The Lone Worker App, you can start accessing our 24/7 service for as little as £3.99 per lone worker per month, it really is that simple!

We would also be happy to discuss our introductory offers with you and your team, if the Lone Worker App is something you are considering.

Free Lone Worker Intro...

Our team will be happy to then meet with your lone workers either on a one-2-one basis or as a group, to walk them through how the App works. We will then be ready to go live!

asboperations.co.uk...

Be sure to visit our website for further information about The Lone Worker App as well as all of our other services such as the Respect Line and The ASB App!

Our commitment to you...

We are proud of keeping people safe in the workplace. Whether you are a Nurse, Housing Officer, Maintenance Contractor, Shop-Worker, Care Provider or if you are working alone at any point in your role, our dedicated team are there for you, supporting and protecting you round the clock.

ASB Operations specialises in dealing with serious issues of anti social behaviour and by the very nature of our core business, we are experts in looking after people. We want to do this for you too!

Call us today to get started - 0800 075 66 99.

Today's Appointments

Sorry, but no appointments are setup

Logging on to The Lone Worker App is quick and easy for you, simply enter your username and unique pin number and you are ready to go!

From point of opening the App to the point you are ready to work alone, takes just 3 seconds!

Manage your appointments easily with the appointments page, clicking the address you are visiting and how long you will be there.

The App is closely linked with the back-end of the system your end, so you can easily manage the appointments page, with just a few clicks.

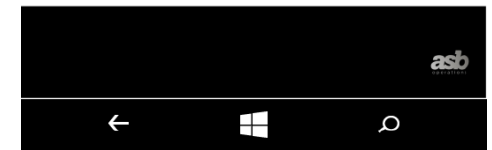

1 Example Street, ., .

15:58 to 16:43

Due in **43 minutes**

You can raise an alarm, extend your lone working session or simply complete the appointment at any given time throughout your appointment.

Or, if you so wish, you can use the roaming alarm page, which allows you to raise an alarm wherever you are, prompting an immediate response from our Alarm Centre.
